

## **TSA LEAP LEADERSHIP RESUME — TEAM EVENT**

### **TEAM IDENTIFICATION**

**Team ID: T5095**

**Competitive event: Webmaster**

**Level: High School**

#### **Leadership Experiences** (specific to a competitive event)

- Team members followed the timeline that we created before starting the project (Do)
- We each stepped up to complete tasks that we were not familiar with such as creating a demo chatbot (Be)
- We learned how to efficiently use bootstrap to make our site responsive (Know)
- We Implemented frameworks such as Sketch.js and libraries such as bootstrap (Do)
- Each member took the AP Computer Science course in school to improve their algorithmic thinking (Know)
- The team created well-formatted, readable and easily modifiable code to become more organized (Be)
- We learned the intricacies of CSS to create advanced animations (Know)

**LEADERSHIP EXPERIENCES** (connected to one or more of these categories: Leadership Roles; Community Service/ Volunteer Experiences; Leadership Development/Training; College/Career Planning)

#### **Leadership Roles:**

- The entire team hosts weekly Scratch classes for young students at the local library. These classes are made up of almost 30 students each. (Do)
- Two of the team members hold leadership roles on the school's FIRST Robotics team. One manages the business subteam while the other directs outreach operations. (Do)

#### **Community Service/ Volunteer Experiences:**

- Three of the team members are tutors for an organization called A2Z. They help students with STEM related subjects for an hour long session every week (Do)
- One of the students volunteers at red cross blood donation camps where he manages the help desk and helps potential blood donors (Do)

#### **Leadership Development/Training:**

- One member is being trained to become a coach for an First Lego League Team (Know)
- One member is a Teaching Assistant for the AP Computer Science class at school and is learning how to improve his teaching skills (Be)
